Professional Summary

Final-year B.Tech Computer Science Engineering student specializing in Artificial Intelligence, Machine Learning, Backend Engineering, and Cybersecurity with hands-on experience in scalable backend development, AI system integration, REST API development, and automation workflows. Currently working as a Backend Intern at **Prudent AI**, building enterprise-grade backend systems using **Django** and **FastAPI**. Experienced in NLP, Deep Learning, Testing Frameworks, Docker, CI/CD Pipelines, and Secure System Design through internships at IIT Madras (CYSTAR Lab), Cavel Labs, and Izeon Innovative Pvt Ltd. Passionate about developing intelligent, secure, and production-ready software systems.

Education

B.S. Abdur Rahman Crescent Institute of Science and Technology, Chennai	2022 – 2026
B.Tech in Computer Science Engineering	CGPA: 8.7 / 10
Kendriya Vidyalaya No. 2 AFS Madambakkam, Chennai	2020 – 2022
Senior Secondary (Class XII)	81%
Kendriya Vidyalaya No. 2 AFS Jorhat, Assam	2019 – 2020
Secondary (Class X)	88%

Technical Skills

Programming Languages:	Python, C++, JavaScript, Java
Backend Development:	Django, FastAPI, REST APIs, API Design, Authentication, Microservices Architecture
Artificial Intelligence / Machine Learning:	Machine Learning, Deep Learning, NLP, TensorFlow, PyTorch, Scikit-learn, Model Deployment
Testing & Automation:	Pytest, Unittest, Mock Testing, API Testing, Automation Testing
Frontend & Full Stack:	ReactJS, Angular, Node.js, Streamlit
Databases:	SQL, PostgreSQL, MySQL
DevOps & Tools:	Git, Docker, Linux, CI/CD Pipelines, VirtualBox
Cybersecurity:	Penetration Testing, Vulnerability Assessment, Wireshark, Burp Suite, Metasploit, Threat Modeling
Languages:	English, Hindi, Urdu, Telugu, Tamil

Experience

Prudent AI, Chennai	Dec 2025 – Present
----------------------------	--------------------

Backend Intern

- Developing scalable backend systems using Django and FastAPI for AI-driven enterprise applications.
- Designing and optimizing REST APIs to improve backend communication and system performance.
- Implementing automated testing pipelines using Pytest, Unittest, and Mock frameworks to improve software reliability.
- Improving application stability through structured logging, validation mechanisms, and backend optimization techniques.
- Collaborating with development teams on production-ready AI integration workflows and API architecture.

IIT Madras – CYSTAR Lab	Jul 2025 – Mar 2026
--------------------------------	---------------------

Research Intern

- Conducted cybersecurity research under Prof. Chester Rebeiro focusing on secure system design and exploit analysis.
- Developed an AI-assisted PDF-to-Adaptive Quiz Generation platform for training and educational workflows.
- Implemented NLP-based semantic chunking and automated question generation pipelines.
- Contributed to threat analysis and secure architecture design for AI-driven applications.

Cavel Labs (Remote)

Jul 2025

Product Intern

- Contributed to secure full-stack development and backend automation workflows.
- Assisted in CI/CD integration, deployment optimization, and application performance improvements.
- Collaborated with development teams to improve software scalability and deployment reliability.

Izeon Innovative Pvt Ltd

Jun 2024

Network & Cybersecurity Intern

- Configured and maintained routers, switches, and firewalls for secure networking environments.
- Designed network topologies using Cisco Packet Tracer for traffic analysis and security testing.
- Performed vulnerability assessments and assisted in penetration testing activities.

Projects

PDF to AI Adaptive Quiz Generation System

FastAPI, NLP, Python, Docker

- Built an AI-driven platform that converts PDFs into adaptive quizzes using NLP and semantic chunking techniques.
- Designed FastAPI backend services for quiz generation, scoring, and performance tracking.
- Developed adaptive learning logic to dynamically adjust difficulty levels based on user responses.
- Implemented automated question generation workflows using AI and NLP models.

MindCare – AI Mental Health Support Platform

Django, NLP, Machine Learning, Python

- Developed an NLP-powered conversational assistant for emotion and sentiment detection.
- Built secure Django backend services for user session management and personalized recommendations.
- Implemented machine learning models to classify stress levels and recommend coping strategies.
- Designed scalable backend workflows for AI-based mental health support systems.

Deep-Fake Detection System

CNN, TensorFlow, Python, Deep Learning

- Developed CNN and transfer learning models for manipulated media detection and image classification.
- Applied ensemble learning techniques to improve detection accuracy and model robustness.
- Built real-time media upload and authenticity verification interface.
- Worked on AI-based media analysis pipelines for synthetic content detection.

Hackers Playground

Cybersecurity, Full Stack Development, Python

- Designed a gamified cybersecurity learning platform with real-world attack simulations.
- Implemented backend validation systems, scoring mechanisms, and quiz analytics.
- Integrated progress tracking and learning analytics for cybersecurity training workflows.
- Developed interactive security challenges simulating real-world cyber attack scenarios.

Certifications

- Google Certified Cybersecurity Professional Certificate
- CYSTAR IIT Madras internship certificate in the domain of Cybersecurity research intern

Achievements

- Secured 1st Position in College Project Expo for the AI-based MindCare platform.
- Participated in Smart India Hackathon (SIH) project development initiatives.
- Built multiple AI, backend, and cybersecurity projects focused on real-world applications.
